E = _____ **mm**

H = _____ **mm**

F = _____ °

Mansard and pent roof tiles are manufactured individually according to your dimensions from two flat roofing tiles. Details of the roof pitch, laths and side lengths are the basis for production. The roofing tiles are cut to size according to the roof pitch, then bonded with 2-component epoxy resin adhesive and produced in the desired colour. You will receive a sample roofing tile for comparison. Following approval with or without corrections we will inform you of the delivery date.

Advance sample approved: _____

Corrections: _____

Correct measurements:

Most of the dimensions needed arise from your experience in day-to-day work.

We would like to make special mention of the following dimensions:

(A): measured from the top of the roofing tile to the water trough in the kink. Dimensions (H) and (G) are measured from the top of the laths to the side trough in the kink. Dimension (B) is measured from the water trough to the underside of the roofing tile.
